WORK EXPERIENCE

Reddit Inc, San Francisco, CA (Remote)

Software Engineer - Advertiser Growth

Feb 2023 - Dec 2023

- Engineered intricate UIs with React, Web components, and other web frameworks.
- Implemented rigorous testing (Jest, Playwright), ensuring robust code coverage for UI components.
- Contributed to a cohesive team effort that resulted in over 50% increase in monthly advertisers.
- Implemented and monitored user events using Grafana for metrics and alerts, ensuring system health.
- Innovated features: Community Suggestions, Bidless ads, Reddit post boost, and chatbot integration.

Aerial, Arlington, VA (Remote)

Full-Stack Developer

Dec 2022 - Feb 2023

- Engineered full-stack apps with tRPC, Next.js, and MongoDB for streamlined legal document management.
- Implemented user-requested features based on interviews, showcasing a user-centric development approach.
- Developed GitHub Actions routines to detect errors and prevent the merging of suboptimal code.
- Ensured high-quality development practices through thorough code reviews and provided transparent project insights with comprehensive documentation on Notion.

OpenSpec, Tel Aviv (Remote)

Full-Stack Developer

April 2022 - Nov 2022

- Engineered a full-stack application with Machine Learning to empower Project Managers in crafting product requirements, utilizing OpenAI, React, Prisma, and NodeJS.
- Achieved a remarkable 40% performance boost in the application through global state management, analyzed with React profiler.
- Elevated user experience by implementing an onboarding flow with tooltips and popper.js.

Brimble, Lagos, NG

Web Developer

Sept 2021 - March 2022

- Spearheaded the transformation of Brimble's website, creating and styling React components for the front page, improving aesthetics and user engagement.
- I revitalized the website with PWA, boosting conversions by 55%. Streamlined Vue to React migration, ensuring code excellence. Published 5+ tech articles on [DEV.to](https://dev.to).

SKILLS AND CONTRIBUTIONS

JavaScript, TypeScript, React, Node.js, Python, System Design, CI/CD, DevOps, Docker

- Engaged and inspired over 30,000 readers on [Dev.to](https://dev.to), cultivating a vibrant community of continuous learning and knowledge-sharing.
- Contributed to [ts-mongo](https://ts-mongo.com) and created [use-pagination](https://use-pagination.com), showcasing collaborative development skills.
- Co-founder & CTO at [Jetron Ticket](https://jetron.com), a major Nigerian ticketing service.

EDUCATION

Landmark University Aug 2017 - Sept 2022

B.E Mechanical Engineering (4.82/5.0)

College Representative and Class Representative
